Terminology

In an effort to help promote a healthier understanding of the Arab-Israeli conflict we have created the following list. On the left are commonly used terms. On the right is the appropriate understanding of what each term actually means. If you find yourself or someone else using one of the terms in the left column, it is our hope you will reconsider giving life to such terminology, and lovingly suggest it to others. By using the words in the “right” column you will breathe life into an understanding which counteracts what the “world” wants you to believe.
